

- [keys jangling]

- [Narrator] At TFL, we start every day with the same ambition, to keep making your journeys with us brighter, because the Elizabeth line is now complete, and we are continuing to improve our tube and rail network. We've made all our buses low or zero emission at the tailpipe, including those for our Superloop routes. We've made more journeys more accessible to all, and we've frozen pay as you go single fares across tube, bus, and most TFL rail journeys. That is how we are making greener journeys in London brighter for everyone, because every journey matters.
